TECHNICAL SHEET

Laminated Low-E & Reflective Glass

Laminated Low-E & Reflective Glass provides both safety and energy efficient capabilities. Each type of Glass is customised to meet each project's requirements by adjusting from our wide range of Low-E & Reflective coatings. This range consist of different tints, performance and thickness. Available in Float, Heat Strengthened, Tempered, Insulated glass options.

Advantages

- Safety
- Acoustic Performance
- UV Reduction: Up to 99%
- Thermal Insulation & Solar Control

Size and Thickness

- Size: 190*300mm to 3300*13000mm
- Thickness: 6-50mm
